

# Decoupled Aquaponics (DA)

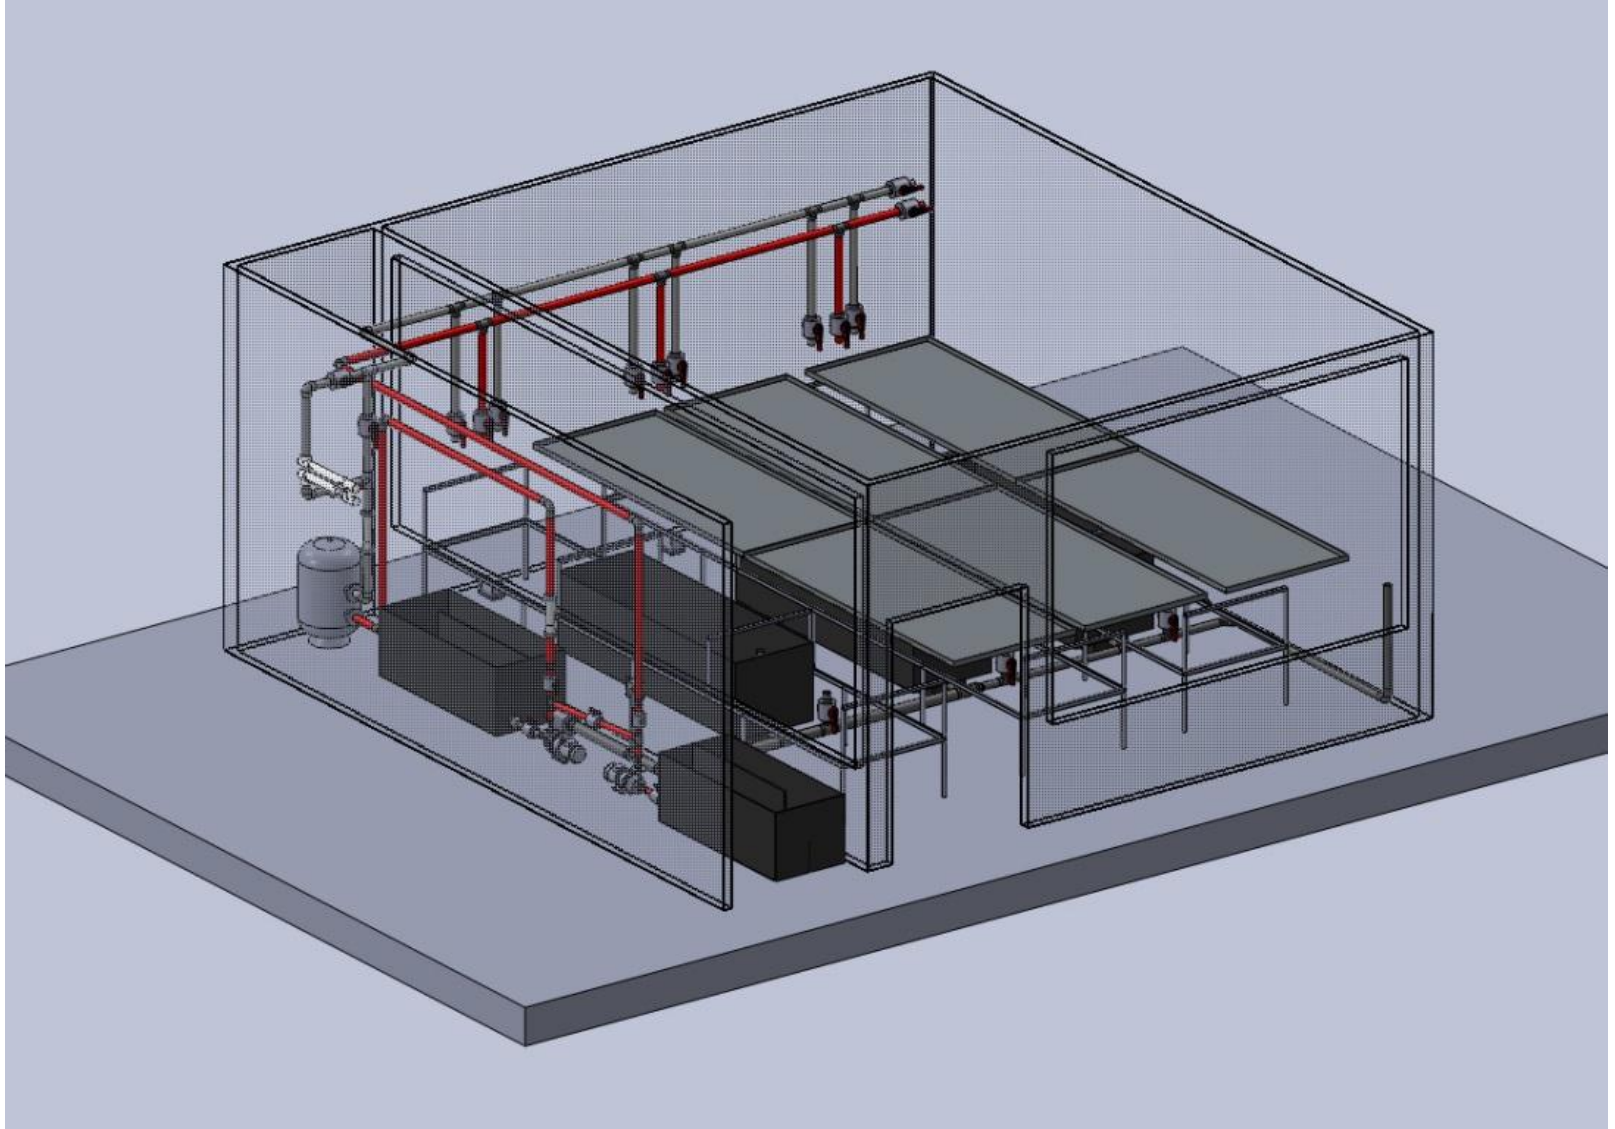

**Leonardo Workshop Iceland 10.06.15**

[www.igff.dk](http://www.igff.dk), [paul@igff.dk](mailto:paul@igff.dk)

# Basic principle of DA

# IGFF TEST PLANT semi-DA

# IGFF semi-DA

# BENEFITS OF DA

- Reap the advantages of the symbiotic effects, but also eliminating dependency and risk
- Optimizing economy of each production system without constraints from the other production system
- Eventual Food safety regulations can be fulfilled (UV lighting of fish manure before entering land area)
- Contamination/sanitation is feasible

# DA: the key to commercial scale aquaponics?
